This evidence falsifies the scientific assumption that consciousness is simply a product of brain activity, and verifies that the loss of ordinary consciousness at least for some enables an experience of transcending meaning. Cardiologist and NDE researcher Pim van Lommel reports that the "enhanced consciousness" during an NDE includes "nonlocal aspects of interconnectedness, such as memories from earliest childhood up until the crisis that caused the NDE and sometimes even visions of the future. It offers the chance of communication with the thoughts and feelings of people who were involved in past events or with the consciousness of deceased friends and relatives." To explain NDEs,...
